MuleSoft Integration Engineer | API & Cloud Integration Specialist | AI Enthusiast

Professional Summary

Integration Engineer with 7 years of IT experience specialized in enterprise applications, microservices, RESTful APIs and Integration Solutions. I am skilled in designing and developing integration architecture with deep expertise in API life cycle and Integration design patterns. Proficient in Anypoint Platform, AWS Console, Azure DevOps, Azure Integration Services and Scripting. Adept at managing cross-functional, onshore and offshore teams, talent recruitment and mentoring. Experienced in client-facing roles, fostering collaboration across geographies. Strong focus on delivering high quality, compliant solutions while driving innovation, optimizing performance, and enabling business value through integration excellence.

Education

Bachelor of Engineering (B.E.) – Computer Science and Engineering MIT Mysore, VTU Belgaum | 2015 – 2019

Certifications

- MuleSoft Certified Developer – Level 1 (Mule 4)
- MuleSoft Certified Developer – Level 2

Technical Skills

- **Runtime / Frameworks:** Mule 4.x, DataWeave 2.x, Java 8/17, Python, Azure Integration Services
- **Methodologies:** Agile (Scrum, Kanban)
- **Integration & Deployment:** Mule ESB, Mulesoft 4.X, Azure Data Factory, Logic Apps, Azure Functions, Anypoint Platform, RTF (AKS/EKS/Appliance), CloudHub 1.0/2.0, On-Prem Mule Runtime
- **Messaging Systems:** Anypoint MQ, ActiveMQ, RabbitMQ, Solace
- **CI/CD & Quality:** Azure DevOps, Jenkins, GitLab, Bitbucket, SourceTree, GitHub, SonarQube
- **Cloud Platforms:** Azure (Data Factory, Logic Apps, Functions, APIM, Key Vault, Storage, VMs), AWS (Lambda, EC2, API Gateway, SQS/SNS, Transfer Family)
- **Markup & Data Formats:** RAML, YAML, XML, JSON
- **MuleSoft Connectors:** A2A, AI Chain, Inference, MCP, Einstein AI, Agentforce, Salesforce, Amazon S3/SQS/DynamoDB, Solace, HTTP, SFTP, Database, AMQP, SAP, Crypto PGP, SMB, File, Email, Twilio
- **Cloud Platforms:** AWS, Azure
- **Databases:** MySQL, MS SQL, Oracle
- **Agile Tools:** Jira, Confluence

- **IDEs:** Anypoint Studio 21, VS Code
- **Operating Systems:** Windows, macOS, Linux
- **Monitoring & APM Tools:** Dynatrace, Kibana, Splunk, Anypoint Monitoring, ServiceNow

Project Experience

Project 1: *Contact and Consent Master for Volvo Group (March 2026 - present)*

Role: Salesforce Consultant

Responsibilities:

- Design and Develop Mulesoft API LED to handle the Contact and Consent Management.
- Design and Develop Salesforce LWC for Preference Page for independent dealers to manage their consents.

Project 2: *American Builders and Contractors (ABC) Supply @ Publicis Sapient (Nov 2024 – March 2026)*

Role: Integration Engineer

Responsibilities:

- Led the **Retail Domain Enterprise Integration Program** structured into 10 value streams, each responsible for key business processes.
- Directed two streams — **Integration Enablement (INE)** and **Integration Platform (ITP)** — contributing to the integration design for **Customer Management, Order Management, and Product & Pricing** modules.
- **Integration Platform (ITP) Team:**
 - Developed a **Parent POM** and **Mule Common Library** for reusable components across MuleSoft APIs.
 - Planned and delivered **140+ APIs** in alignment with project timelines.
 - Performed **Java 17** and **runtime upgrades** with complete regression testing.
 - Migrated APIs from **CloudHub 1.0** to **CloudHub 2.0** environments.
- **Integration Enablement (INE) Team:**
 - Designed and developed **Product Inventory Sync** between POS and eCommerce systems using **Azure Data Factory (ADF)**.
 - Built a **robust alerting framework** to prevent duplicate ServiceNow incidents from Splunk alerts.
 - Executed a **stabilization plan for 28 APIs**, significantly reducing production noise. • Achieved a **60% reduction in monthly incident tickets** through initiative-taking performance tuning and monitoring.
- **Agentic Onboarding for Order & Product Inventory Management:**
 - Designed and implemented a **working POC** for Order and Product data management using the **A2A model**.
 - Developed and deployed **two autonomous business agents** that interact dynamically to exchange Product and Order data based on system inputs.
 - Specialized in **AI prompt engineering** and **instruction design** for tool planning and orchestration.

- **End-to-End Integrations Designed:**

- Implemented **Order synchronization** from ERP to Digital Central DataHub for real time POS order alignment.
- Built **Customer Master Data synchronization** between POS and ERP systems.
- Delivered **Vendavo Pricing Engine integration** between eCommerce/POS and ERP to streamline pricing and product consistency.

Project 3: New York Life (NYL) Insurance @ **Cognizant Technology Solutions** (Oct 2022 – Nov 2024)

Role: Senior MuleSoft Developer

Responsibilities:

- **Insurance Domain Project** – Served as **Senior MuleSoft Developer**, contributing to the design and development of a **greenfield integration architecture** for the new underwriting platform **A Total Line Underwriting System (ATLUS)**.
- **Salesforce ↔ ATLUS Integrations:**
 - Designed and developed real-time synchronization integrations for voluntary insurance products, including **Accident Insurance (AI)**, **Critical Illness (CI)**, and **Hospital Indemnity (HI)**.
 - Implemented **ATLUS-to-Salesforce** synchronization for “*Most Likely to be Sold*” products to ensure real-time product availability and consistency across systems.
- **Document Generation Integrations:**
 - Built seamless integrations between **SmartComm** and **ATLUS** to manage business approved document templates across multiple products such as **Basic Term Life (BTL)**, **Voluntary Term Life (VTL)**, **Long-Term Disability (LTD)**, and **Short-Term Disability (STD)**.
 - Designed and implemented the **document generation workflow** between **FileNet** and **SmartComm**, automating document creation and distribution.
- **Quality Assurance & Release Management:**
 - Partnered with the QA team to support business testing, validation, and defect resolution.
 - Collaborated with the platform team to manage **deployment**, **release planning**, and **production rollout** with minimal disruption.
- **Hypercare & Support:**
 - Provided **post-go-live Hypercare support** and delivered structured **knowledge transfer** sessions with complete documentation to the production support team.
 - Developed an **Integration Dashboard** for real-time business audit, operational visibility, and monitoring of key integration transactions.

Project 4: Booking Holdings Inc. @ **Accenture** (Oct 2021 – Aug 2022)

Role: MuleSoft Developer

Responsibilities:

- Developed **event-driven** and **SFTP-based** integrations for large-scale travel management systems.
- Implemented **PGP encryption and decryption** to ensure secure and compliant data exchange between internal and external systems.
- Designed, developed, and delivered **40+ real-time APIs** leveraging **HTTP** and **SOAP**

protocols.

- Collaborated with solution architects to define **file-based integration patterns** for optimized data processing and reusability.
- Provided **hypercare and stabilization support** post-go-live, ensuring smooth operations and minimal production issues.

Project 5: Coca-Cola European Partners @ **Quinnox Consultancy Services** (Jul 2019 – Oct 2021) **Role:** MuleSoft Developer

Responsibilities:

- **Retail Domain Project** – Worked as a **MuleSoft Developer** focused on integrating **Salesforce** with legacy enterprise systems.
- Designed, developed, and delivered **12+ Salesforce integrations** using MuleSoft to streamline data exchange and business workflows.
- Provided ongoing support for **WebMethods (Software AG)** integration, ensuring seamless coexistence and interoperability with MuleSoft services.

Declaration

I hereby declare that the information provided above is true to the best of my knowledge.
